

Test Case ID: GTC_CBF69B

Title: Verify login after password reset - Edge case

Objective: This test case verifies the behavior when the user resets the password multiple times before logging in.

Preconditions: User has required setup

Test Steps: Reset the password for the user account multiple times. Navigate to the login page. Enter the username and the latest password. Click on the login button. Verify that the user is able to login with the latest password.

Expected Result: The user should be able to login with the latest password even after resetting it multiple times.

Confidence: 80%
