

Test Case ID: GTC_0B6840

Title: Verify login functionality is disabled after multiple unsuccessful attempts post password reset

Objective: This test case verifies that the login functionality is disabled after multiple unsuccessful login attempts following a password reset.

Preconditions: User has required setup

Test Steps:

Reset the password for the user account

Attempt to login multiple times using incorrect credentials

Verify that the login functionality is disabled after reaching the maximum allowed attempts

Expected Result: The login functionality should be disabled after multiple unsuccessful login attempts following a password reset.

Confidence: 80%
