Test Case ID: GTC-117

Title: Test Case: VerifyDataEncryption

Description: Ensure that sensitive data is properly encrypted to protect it from unauthorized access or tampering.

Steps:
Input sensitive data into the system.
Check the system's database or storage to verify that the data is encrypted.
Attempt to retrieve the sensitive data without proper authorization.
Verify that the data remains encrypted and inaccessible.

Expected Result: Sensitive data should be encrypted and inaccessible without proper authorization.

Confidence: High
