Test Case ID: GTC-123

Title: Test Case: ValidateAutoGeneratedResponseTime

Description: Check the response time of the auto-generation process to ensure it meets performance requirements.

Steps:
1. Start the auto-generation process.
2. Measure the time taken for the process to complete.
3. Compare the response time against the defined performance benchmarks.

Expected Result: The response time of the auto-generation process meets the performance requirements.

Confidence: 70%
