Test Case ID: GTC-122

Title: Test Case: VerifyAutoGeneratedDataConsistency

Description: Ensure that the data generated automatically by the system is consistent and accurate.

Steps:
1. Trigger the auto-generation process.
2. Compare the generated data with the expected values.
3. Check for any discrepancies or inconsistencies.

Expected Result: The auto-generated data matches the expected values without any discrepancies.

Confidence: 90%
